SPEED TABLE

The table below will enable you to relate competitor's times for the climb with their average speed for the 1090 yards of the course. To get these average speeds into perspective, remember that times are taken from a standing start and that some of the corners are very slow. As an example, when Peter Kaye set the course record to 38.18 secs on 13th May 1979, this was an average speed of 58.39 m.p.h., but he was timed through the speed trap on Quarry Straight at just over 107 m.p.h.

If anyone wants to get really precise, if they divide a constant of 2229.5454 by their time in seconds and hundredths, it will give their exact average speed.

HAREWOOD HILL CLIMB CHAMPIONSHIP

FTD AWARDS SERIES — TOP TEN CHAMPIONSHIP RUNS

After both Class Runs have been completed, the eligible drivers who have recorded the 10 fastest times in those class runs are given the opportunity of making two special Championship Runs. In each of these runs the competitor who qualified with the slowest time runs first and the fastest last. Points are scored for the HAREWOOD F.T.D AWARDS on the basis of 10,9,8,7,6,5,4,3,2 & 1 for finishing in 1st to 10th places in the Championship Runs. There is also one Bonus Point for any competitor who, in the Championship Runs, beats the course record which was standing at the commencement of the meeting.

HAREWOOD RECORDS

The first meeting at Harewood took place on 16th September 1962. At that time the road had a tar and chipping surface. It was tarmac'ed before our first National Meeting on 8th September 1963 with a limestone based tarmac which grew very slippery. That surface was replaced with a surface of non-slip asphalt with a sharp slag base which was laid for the meeting on 21st July 1968. The present surface of a similar nature to the last was laid in March 1985.

The Fastest Times of the Day at each of the previous meetings is given below. ** indicates the course records as they were set.
