# CHAMPIONSHIP MARKING SYSTEM

## Main Championship and Ladies Championship

Marking is within classes, based on the improvement against the bogey time. The 2005 bogey times are the current class record at the start of each meeting with 18 seconds added. Championship marks are gained at the rate of 0.01 points for each 0.01 seconds by which the driver beats the bogey time of his or her class. A maximum of 20 marks can be gained at any meeting.

Any competitor who does not beat the bogey time will gain no marks for that meeting. Marks can only be gained in the two class runs at the 15<sup>th</sup> May and 3<sup>rd</sup> July meetings. At the other seven rounds the three timed runs will count, unless a decision to the contrary is made after the first timed run. Marks in six of the nine rounds will count towards the championship result.

### Fastest time of the day

At each meeting marks will be awarded to the championship competitors who have recorded the ten fastest times of the day in the class runs. Marks will be awarded on the scale of 10 for the fastest competitor down to 1 mark for the tenth.

# WELCOME TO HAREWOOD

On behalf of the BARC Yorkshire Centre, we welcome you all to our 2005 Harewood Speed Hillclimb series.

## Brief history

Harewood has been used as a hillclimb since 1962 when the track started at the lower part of the course just after Chippy's corner (see map). The surface then was tar and chippings. The fastest time set for this short course was over 51 seconds (see records page). Then in mid 1963 the track was upgraded to a tarmacadam surface. In 1992 the track was extended back from Chippy's to the new start, making it the longest permanent hillclimb course on the UK mainland.

## Our sponsors and advertisers

BARC Yorkshire Centre would like to thank all our sponsors and advertisers for their generous support, which helps us continually invest in our events and the venue.

# HAREWOOD SPEED HILLCLIMB COURSE

There are many good spectator spots at Harewood. Why not watch at the start or down at the Esses and Chippy's. Try the in-field area above Orchard Corner or the viewing area on the outside of Farmhouse bend. Then there's the favourite hillside viewing area and also at the corner of the paddock overlooking Quarry Corner and the Finish line. Try somewhere different, you will be amazed at the difference and feel of speed!

# WHAT IS *Speed* HILLCLIMBING?

The challenge of *Speed* Hillclimbing is to drive the course in the shortest possible time. The faster drivers are those who can get the car off the start quickly, the first 64 feet often takes as little as two seconds, and then find the quickest and smoothest lines through each corner. The fastest cars can complete the 1448 metre course in a little over 50 seconds, with speeds exceeding 125 mph!

Timing strut

Photo © Dale Cordingley 2005

Cars are called down to the start in class order. Where a car is shared by another driver, the second driver (their numbers will start with a 7 or 9), will go down to the start in the batch before the other driver. The entries are divided into classes, so that similar cars compete against each other. Each driver not only competes in his or her own race against the clock, but also against other drivers in cars of similar performance.

Each car carries a small vertical blade at the front called a timing strut. As a car approaches the start, the marshals line the car up immediately behind the timing beam. A chock behind the rear wheel keeps the car in the right position.

When the driver is given the green light, they start in their own time. As the car moves forward it breaks the light beam and starts the electronic timing equipment.

At the finish line there is another light beam that stops the digital timing equipment for that driver's run. In addition to the start and finish timing beams at Harewood, there are other beams that allow the driver to see their 'split' times at given points on the course after their run. These times are shown on the bank of monitors at the rear of the paddock office (see map for location of split time points).

If a car stops, slows or comes off the course, the marshals may show a red flag. This warns following drivers of a potential hazardous situation ahead. As a result a car may have to abandon a run through no fault of the driver and so will be given a re-run. If the red flag is given before Orchard the driver will return to the start via the road behind the barn. Otherwise the driver will continue to the finish, at a slower speed, then go down to the start via the slip road, to take the re-run.

Up to four cars can be on the hill at any one time. Timing is to the nearest one-hundredth of a second, a tiny amount, but one that can often decide a class win.

Leaving the start – note the lights and the marshal holding the wheel chock

Photo © Dale Cordingley 2005

Last year a mere 0.16 of a second decided the championship, which takes the best scores out of six events! The ultimate achievement at each event is to establish the Fastest Time of the Day (FTD). This is usually claimed by one of the high-powered single seater racing cars, although wet weather can sometimes throw up an occasional surprise!

**KEY:** H = Harewood OMS Racing Championship  
T (after engine capacity) = turbocharged  
S (after engine capacity) = supercharged

We are delighted that today's meeting is supported by Kroll, the corporate advisory and restructuring group. Today is the final round of the 2005 OMS Racing Harewood Speed Hillclimb Championship. The positions after round 7 are shown on page 5 in this programme, but don't be fooled in to thinking all is done and dusted. Drivers can now drop their lowest score (only 6 scores count), so by the end of today the table may look somewhat different, especially in the main championship. We have three visiting championships today from the Ginetta, MG and Lotus 7 Clubs. Action is guaranteed!
